Welcome the all-new 2008 TRX®700XX, a.k.a. the biggest, baddest sport ATV we've ever built. Powered by a new 686cc SOHC liquid-cooled fuel-injected, four-valve, four-stroke engine; riding a double-wishbone suspension with dual-spring front shocks and independent rear suspension and piggyback rear shocks, the TRX700XX is living, big-bore proof that bigger is definitely better.
